Thanks. I let Bob Sussman know. We have a meeting with Pebble CEO John Shively this morning. Good timing on their part.

Jeff

Subject: Bristol bay washington post

Check out page A7 of today's print edition of the Washington Post. Half page color add by Northern Dynasty Minerals (part owner of Pebble Project) with a photo of the cover of the Bristol Bay executive summary and the title "scientists know bad science when they see it.". Then at the bottom a bunch of quotes from the peer review panel.
